CARRER OBJECTIVE

Motivated and passionate Associate Software Engineer with hands-on experience in Angular, Firebase, and cloud-based solutions. Looking to contribute to impactful projects and advance my skills in full-stack development within a growth-oriented company.

SKILLS

- **Programming Languages:** Typescript, HTML5, CSS3
 - **Libraries and Frameworks:** Angular, Bootstrap, Tailwind CSS, Ionic
 - **Backend & Database:** Firestore, Google Cloud Platform
-

WORK EXPERIENCE

Associate Software Enginner

Adaptive Development Private Limited (Formerly Adaptive Media)

July 2024 – Present

- Streamlined frontend development for Pet Care Application and Asisa Insurance Website using Angular, ensuring fully responsive and user-friendly interfaces across all devices.
 - Resolved major UI/UX issues and improved visual consistency through collaboration with design and QA teams, significantly reducing user interface problems.
 - Integrated Firebase Authentication and Firestore to securely manage real-time user data and implement access control, enhancing overall app security and performance.
 - Participated in code reviews, unit testing, and debugging sessions to ensure high-quality, maintainable code aligned with project standards.
 - Collaborated in Agile sprints and daily standups to plan, track, and deliver frontend features on time, while managing version control using Git and ensuring smooth team workflows.
-

RELEVANT PROJECTS

Project Name: Product Management Website | [product-66ae3.web.app](#)

- Created a product management website using Angular, Bootstrap, and Firebase where users can sign up, log in, and add their own products.
- Enabled all users to view and access products added by others in real-time, similar to apps like OLX, where anyone can explore and buy shared products.

Project Name: Whatsapp Clone | [whatsapp-f646c.web.app](#)

- Built a WhatsApp clone UI using Ionic, replicating core chat interface screens with responsive mobile-friendly design and smooth navigation.
-
